Data and Analytics Engineer with 3+ years of experience building Python and SQL pipelines, ETL workflows, operational dashboards and automation across Meta, Oracle and enterprise IT environments. Strong in data engineering, cloud infrastructure, database integration and analytics tooling, with experience supporting business-critical reporting and operational decision-making at scale.

Work Experience

Meta

Operational Support Specialist

Aug 2025 – Present

- Built and maintained 5+ operational dashboards tracking support KPIs across enterprise customer workflows, enabling faster visibility into resolution time, escalation rates, backlog movement and ticket throughput
- Developed Python and SQL data pipelines to transform raw operational data into structured metrics for business reviews, executive reporting and cross-functional decision-making
- Created ETL workflows integrating multiple data sources, improving reporting consistency and reducing manual effort in monthly analytics processes
- Supported AI product pilot launch by building analytics infrastructure to measure model accuracy, throughput and operational efficiency
- Authored 10+ code contributions improving metrics pipelines, data validation, deduplication logic and overall reporting reliability

Tech Stack: Python, SQL, Presto, ETL, Dashboards, Data Validation

Oracle

Associate Solutions Engineer

Apprenticeship

Jul 2024 – Jun 2025

- Developed tailored cloud solutions using Oracle Cloud Infrastructure to address client business and technical requirements
- Integrated database, REST API, automation and analytics workflows using ORDS, Oracle HeatWave and Oracle Analytics Cloud
- Built a movie recommendation application with Oracle APEX and HeatWave, connecting a MySQL database system to Oracle Analytics Cloud for data exploration and visualisation

Tech Stack: Oracle Cloud Infrastructure, Oracle APEX, Oracle HeatWave, ORDS, REST APIs, Oracle Analytics Cloud

Star Information Systems

Full-Time

Technical Consultant

Apr 2023 – Jun 2024

- Developed PowerShell and Python automation scripts for web scraping, vessel data collection, API integration and operational support workflows
- Implemented file management and log rotation automation, reclaiming 10 GB of storage per vessel and reducing manual maintenance by approximately 1 hour per day
- Extracted and analysed MSSQL data to troubleshoot application issues and support customer-facing incident resolution
- Led customer deployments using automated bootstrapping techniques, improving onboarding efficiency and reducing repetitive setup work
- Managed and resolved support tickets through Jira while coordinating directly with customers and technical stakeholders

Tech Stack: Python, PowerShell, MSSQL, REST APIs, Jira, Windows, Linux

Netpoleons Solutions

Full-Time

Associate Support Engineer

Jul 2022 – Mar 2023

- Provided post-sales technical support, onsite maintenance and after-hours support across customer infrastructure and security projects
- Coordinated with customers and vendor support teams to troubleshoot technical issues, manage escalations and maintain service quality

Tech Stack: Technical Support, Customer Support, Vendor Coordination, Onsite Maintenance

Projects

Maritime Analytics Pipeline

GitHub

- Built an end-to-end maritime analytics pipeline using Python and SQLite to ingest, normalise and analyse marine vessel traffic data
- Engineered ETL workflows to transform raw vessel datasets into structured, dashboard-ready analytics outputs
- Designed a lightweight data model for querying vessel activity patterns and generating actionable maritime insights

Tech Stack: Python, SQLite, ETL, Data Analytics

Education

Singapore Polytechnic

Diploma in Infocomm Security Management

Graduated Mar 2020

Institute of Technical Education

Certificate in Cyber & Network Security

Graduated Mar 2017

Certifications

- IBM Data Engineering Professional
- MySQL HeatWave Implementation Certified Associate Rel. 1
- OCI Multicloud Architect Professional

Technical Skills

Programming Languages: Python, SQL, PowerShell, Bash, Java

Data & Analytics: ETL, Dashboarding, Presto, MSSQL, Data Validation, Reporting

Cloud & Infrastructure: Oracle Cloud Infrastructure, Oracle HeatWave, Terraform, Linux, Windows

Tools/Platforms: REST APIs, Jira, SQLite, Git

Languages: English, Mandarin
